These streets represent a cross-section of urban and suburban neighborhoods across 19 districts of Davidson County. They were selected for projects based on:

## Vulnerable User Crash Survivability & Probability (70%):

*Vehicular speed and volume data collected by NDOT.*

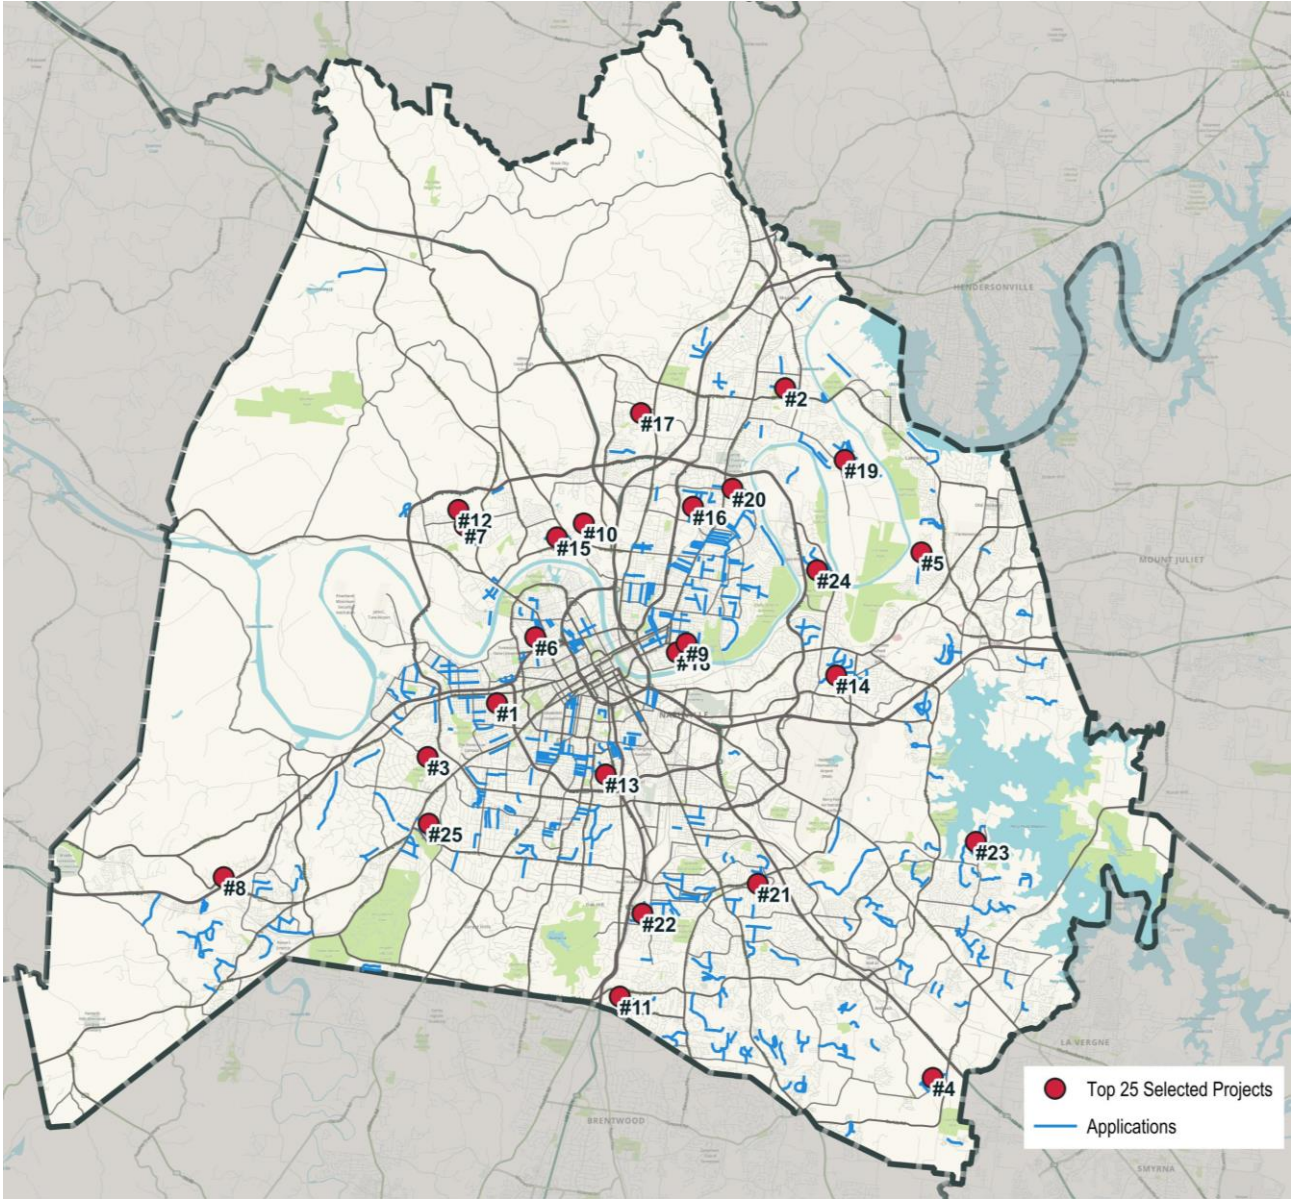

## Vulnerable User Experience (30%):

*Traffic speeds often discourage safe use of streets by pedestrians and cyclists. The presence of likely nearby trip destinations (schools, parks, etc.) non-driver accommodations (bus routes, lack of sidewalks, etc.), and vulnerable user injuries/fatalities are evaluated in this prioritization data category.*

In response to the continued success of the neighborhood street traffic calming program (NSTC), Metro Council allocated a portion of the surplus budget to NDOT to expand the number of streets selected for traffic calming in 2023. As a result, 60 streets were selected from the Winter 2023 prioritization, approved as part of Metro’s surplus budget allocation by Metro Council passed on June 20, 2023.
